

Kailan Walsh

Graphic Designer

Personal Profile

I am a motivated and eager young professional seeking a career in content creation, equipped with a keen interest in problem-solving through design. I'm confident in my ability to work as part of a dedicated team or independently. I have strong written and verbal communication skills which have been a crucial part of my undergraduate study and past employment. Managing multiple ongoing projects throughout my degree is evident that I can complete tasks confidently and efficiently through excellent time management.

Experience

Graphic Designer Sliderfy, Bristol

📅 05/2021 - 08/2021

I developed my skills working within a team to meet tight deadlines. I Edited up to 50 design catalogues each day according to the client's football team badge and colours. I also created at least one custom slider per pack. To ensure I could complete these tasks effectively, I required strong communication skills while working remotely and a seamless workflow between Photoshop, Illustrator, and InDesign.

Graphic Designer/Motion Designer Conquer, Bristol

📅 06/2021 - Present

Working with a local queer community-based art exhibition and music event allowed me an opportunity to showcase my skills in meeting specific briefs as well as adding my creative flair to the design. I acquired Conquer's brand identity by getting to know the team and its audience.

The collaboration was extended, and I continue to design promotional content for Conquer's social media and print materials.

Graphic Designer Watershed, Bristol

📅 06/2022

I received an opportunity to create a poster for the Watershed's queer film festival in association with Conquer & Crotch. This opportunity meant I was working for a well-established local Cinema house. I had to adhere to strict guidelines in the usage of a variety of sponsoring logos and meeting the demands of a very specific brief.
